LOKESH REDDY KAMBHAM

+91 9515467114 | kambhamlokeshreddy@gmail.com | LinkedIn | GitHub | BTM Layout, Bangalore

Professional Summary

Accomplished **Backend Developer** with strong foundations in Python, Django, SQL, and REST APIs. Experienced in building scalable backend services and machine learning–driven applications, including a DDoS detection system with **93% accuracy** and an end-to-end e-commerce web application.

Technical Skills

Languages: Python, SQL, HTML, CSS, JavaScript

Frameworks & Libraries: Django, Flask, NumPy, Pandas

Tools & Platforms: VSCode, PyCharm, Jupyter, Git, GitHub, MySQL

Soft Skills: Analytical Thinking, Effective Communication, Collaborative Mindset, Adaptability

Education

B. Tech in Computer Science Engineering | 2021 – 2025

Siddhartha Institute of Science and Technology, Puttur | **C.GPA: 7.21**

Projects

DDoS Attack Detection using Machine Learning **Backend Developer**

Tech Stack: Python, Django, MySQL, REST APIs, XGBoost, Random Forest

- **Built** a machine learning-based web system using the UNSW-NB15 dataset to detect DDoS attacks with **93% accuracy**.
- **Developed Django-based REST APIs** for real-time attack classification, handling 200 requests/min in a simulated environment.
- **Integrated** XGBoost and Random Forest machine learning models with backend services to predict attack types effectively.
- **Managed** MySQL for data storage, ensuring seamless front-backend communication and database integrity.

Experience

Elite Cart: E-Commerce Web App **Full Stack Web Developer Intern | Rooman Technologies**

Tech Stack: HTML, CSS, JavaScript, Python, Flask, MYSQL

- Developed a **responsive e-commerce web application**, simulating 100+ transactions during testing.
- Built frontend interfaces using HTML, CSS, and JavaScript with cross-browser compatibility.
- **Implemented** backend logic and scalable database integration using Python Flask and MySQL to handle concurrent user sessions.

Certifications

- Python Full Stack – Udemy (Django, REST APIs, MySQL)
- SQL & Data Base Design – Scaler Academy (Sub-Queries, Joins, Indexing, Normalization)

Achievements and Awards

- Secured 1st Place in a State-Level Chess Tournament, competing against 30+ participants from 11 schools.
